

Setting Up a Successful Work Area

To make studying at home successful, every Lion needs a quiet, comfy spot just for learning!

Here are a few tips to set up your space for success:

1. Calm & Quiet!

Find a quiet place to work. TV's and video games are distractions that should not be on during study times.

2. Calming sounds

While listening to music is helpful to some people, it should be at a low volume!

3. Gather Your Materials

Keep your workbooks, paper, pencil, Chromebook, charger, and headphones in one place. Your backpack is a safe, reliable place to keep them so you always have them when you need them!

4. Flat workspace

Find a flat area to work like a table, tray, desk, or counter.

5. One at a time!

Always work on one subject or assignment at a time to focus your attention on just that task!

6. Clean up your materials.

Put all of your materials back into your backpack so you have them ready for the next school day.

7. Charge your Chromebook!
